Education

Texas A&M University

Bachelor of Science, Computer Science

- GPA: 3.6/4.0

May 2028

College Station, TX

Skills

- **Programming Languages:** Python, Java, JavaScript, TypeScript, SQL, HTML/CSS, C/C++, C#
- **Frameworks/Libraries:** React, Node, NextJs, TailwindCSS
- **Tools & Methodologies:** AWS, Git, Github, MongoDB, Visual Studio, IntelliJ, Agile, OAuth 2.0, Rest APIs, Software Development, Data Structures, Algorithms, Debugging
- **AI & Machine Learning:** OpenAI, Cursor, GPT APIs, Raikoo, Speech/Audio Technology, Reinforcement Learning, Machine Learning Infrastructure, Model Deployment, Model Evaluation, Model Optimization, Data Processing

Experience

AMD (Advanced Micro Devices, Inc.)

Jan 2026 - Present

Software Engineer Intern

Austin, TX

- Developed Python automation to validate CPU server power features across remote Linux systems, enabling repeatable regression testing and data processing.
- Orchestrated multi-node performance testing with Ansible and built a unified latency/bandwidth/power scoring pipeline for automated qualification.
- Applied ML-based tuning using Bayesian optimization and reinforcement learning principles to optimize hardware power configurations, conducting model evaluation while debugging system-level issues across containers and firmware.

Arkane Digital

Jun 2025 - Aug 2025

Software Engineer Intern

Remote

- Developed and deployed 10+ AI-powered Raikoo workflows using Python, TensorFlow, and scikit-learn, reducing manual front-end development time by 60% and accelerating feature roll-outs with robust model deployment pipelines.
- Engineered multi-component generation logic with advanced data preprocessing, utilizing core data structures and algorithms and integrating deep learning/NLP models into design-to-code systems, supporting 20+ UI configurations, boosting scalability by 35%, and increasing developer throughput by 40%.

Edikt Studios

Aug 2022 - May 2024

Software Engineer Intern

Frisco, TX

- Designed and developed 4 game prototypes in Unity and Unreal Engine with C++ and C#, implementing gameplay logic, interactive UI elements, and level mechanics that improved overall player experience by 25%.
- Integrated 20+ 3D and 2D assets and optimized builds using physics-based scripting, Agile development, and version control (Git, SVN) to ensure efficient iteration and stable, high-performance releases.

Arkane Digital

Jun 2023 - Mar 2024

Software Engineer Intern

Remote

- Built and deployed 10+ responsive web components using HTML, CSS, and JavaScript while developing and optimizing front-end features in React and Next.js, improving user interaction time by 25%, page load speed by 30%, and SEO ranking by 15%.
- Enhanced and tested dynamic pages across Angular, Node.js, and Express frameworks, collaborating with cross-functional teams to achieve 99.9% uptime and resolve 95% of bugs pre-deployment through Git/GitHub-based Agile collaboration.

Projects

AI Social Media Workflow

- Developed an AI-driven workflow on Raikoo AI using Python to automate cross-platform content generation (LinkedIn, Instagram, X, blogs, articles), reducing manual creation time by 70% and boosting content quality by 30% during internal testing
- Integrated Gemini 2.5 Flash, GPT-4, and vision models into a production-grade pipeline, generating API-compliant captions, images, and JSON payloads and improving automation accuracy and deployment reliability by 40% through a built-in content review interface and end-to-end debugging

Webpage Enhancement

Arkane Digital

- Architected and developed a new landing page with 5+ interactive React/Next.js components and 15+ responsive layouts, improving user engagement by 35%, session duration by 25%, and cross-browser compatibility to 98%.
- Optimized performance using React hooks and state management to reduce load time by 40%, and collaborated with 3+ developers in an Agile Git workflow to deliver 100% of milestones on schedule while resolving 50+ merge conflicts.
